LIGHTING DESIGN

طراحی روشنایی

A modern interior space featuring a series of vertical glass panels. Some panels are solid dark grey, while others are filled with a colorful, pixelated mosaic pattern in shades of blue, green, and white. The floor is a light-colored, polished material, and the ceiling has a dark, slatted design.

DELIVERING WORLD-CLASS LIGHTING DESIGN SOLUTIONS

Lighting affects all aspects of the human experience: our senses, emotions, health and well-being. Light provides an understanding of form, space and material. Within the interplay of light and environment exists the potential for emotional response directly associated with the quality and spirit of place.

We are dedicated to serving our clients by fully exploring the potential in every project by incorporating creativity, technical expertise and sustainability in a way that responds to client aspirations and project goals.
